Work Experience Summary (4.5 yrs.)

Organization	Tenure (Yr.)	Last designation held
Cognizant Technology Solutions	July 2025 - Till date	Associate - Projects
Tata Consultancy Services	March 2021 – June 2025	System Engineer

Certifications:

- Tricentis Tosca Fundamentals - Automating web application testing (AS1)
- Tricentis Tosca Fundamentals - Optimizing test automation with centralized test data (AS2)
- Tricentis Tosca Deep Dive - Structuring your test cases and test data (TDS1)

Career Highlights:

Project: Maersk – SAP SD Support

Client: Maersk | **Role:** SAP SD Support Consultant

Client Overview:

Maersk is a global leader in integrated container logistics, operating in 130 countries, offering end-to-end supply chain solutions that connect, simplify, and decarbonize global trade for sustainable growth.

Key Responsibilities & Contributions:

- Provided L1/L2 support for SAP SD issues including order processing, delivery, and billing for Maersk's logistics operations.
- Resolved user tickets related to customer master data, pricing errors, and invoice discrepancies within defined SLAs.

- Monitored IDoc processing and coordinated with technical teams to resolve interface-related issues.
- Assisted in regression testing and validation during system upgrades and patch deployments.
- Documented recurring issues and created knowledge base articles to reduce ticket volume.

Project: Aptiv – SAP SD Implementation & Support

Client: Aptiv | **Role:** SAP SD Consultant

Client Overview:

Aptiv is a global technology leader designing software and hardware solutions for safer, greener, and more connected mobility. Operating in 49 countries, Aptiv drives innovation in automotive and transportation systems.

Key Responsibilities & Contributions:

- Provided L1/L2 support for SAP SD modules including order-to-cash, delivery, and billing processes for Aptiv's automotive operations.
- Assisted in configuration and testing of sales order types, pricing procedures, and billing scenarios during implementation phases.
- Resolved user issues related to customer master data, invoice mismatches, and delivery scheduling within SLA timelines.
- Monitored and troubleshot IDoc failures and interface errors between SAP and external systems.
- Created user manuals and conducted training sessions to support smooth transition and system adoption across business units.
- Automated testing of SAP Sales and Distribution (SD) module using Tricentis Tosca.
- Focused on end-to-end business processes including Order-to-Cash, Rush Orders, Returns, and Billing.

Project: Walgreens – Automation Testing

Client: Walgreens | **Role:** QA Consultant

Client Overview:

Walgreens is the second-largest pharmacy chain in the U.S., offering prescription services, health and wellness products, and retail goods across over 8,700 stores. It is now owned by Sycamore Partners.

Key Responsibilities & Contributions:

- Developed and maintained Behavior-Driven Development (BDD) test scripts using Cucumber integrated with Selenium and Java for clear, readable test scenarios.
- Performed functional and regression testing of RESTful APIs using Postman for manual validation and Rest Assured for automation within the test framework.
- Executed detailed test cases manually for web and mobile applications, ensuring high-quality releases through defect tracking and reporting.
- Integrated automated test suites with Jenkins for continuous testing and reporting, improving deployment efficiency and reducing manual effort.
- Worked closely with developers and product owners in Agile teams, actively participating in sprint planning, daily stand-ups, and retrospectives.
